

## Marantz PMD650

The Marantz Professional PMD650 has been designed from the ground up to a professional field recorder. Following a long heritage of professional portable recorders, the PMD650 includes many of the original design concepts which have established Marantz Professional as a world leader in the field. Maximum security towards the valuable material that will be recorded with this recorder has been the drive in development of the product. Security aspects include a 20 seconds buffer memory providing shock-resistant recording, a running TOC feature to secure the Table Of Contents continuously while recording and dual level mono recording to secure a back-up on the 2nd channel in case of a signal overload on the main channel. The Marantz Professional PMD650 Portable Minidisc recorder - the only solution for Portable Minidisc.

### FEATURES:

- Running TOC for maximum security towards actual and previous recordings on the disk. The typical loss of data (partial or total) in an MD system when, for example, a battery runs out in the middle of a recording is prevented by the TOC recover function of the PMD650.
- 20 seconds (40s mono) audio buffer (anti shock) active during recording & playback
- Pre-Rec memory cache (2 sec) avoids recording half phrases
- Voice activated recording (Level Sync Recording LSR)
- Balanced (XLR) mic/line inputs, Digital Balanced (XLR) output
- 48V Phantom power
- One touch recording
- Dual Level Mono recording (Left =0dB, Right=-15dB)
- Highest MD sound quality by ATRAC 4 audio encoding
- SP and LP mode (74 minutes Stereo or 148 Mono)
- Editing (Divide/Combine/Move/Erase/Erase All/Title)
- Preset function for user settings
- Time & Date stamp
- 3 Power supply possibilities: Mains adapter (included), 8 dry AA cells (Batteries not included), NiCd Accu (Optional)
